

The listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently Amended) A liquid crystal display apparatus comprising:

a first plastic substrate;

a light-emitting device formed over the first plastic substrate;

a resin covering the light-emitting device;

an adhesive over the resin;

an insulating film formed over the [[resin]] adhesive;

a semiconductor device formed over the insulating film;

a liquid crystal cell electrically connected to the semiconductor device; and

a second plastic substrate,

wherein the semiconductor device and the liquid crystal cell are formed between the first plastic substrate and the second plastic substrate.

2. (Currently Amended) A liquid crystal display apparatus comprising:

a first plastic substrate having a concave portion;

a light-emitting device formed in the concave portion of the first plastic substrate;

a resin formed in the concave portion to cover the light-emitting device;

an adhesive over the resin;

an insulating film formed over the [[resin]] adhesive;

a semiconductor device formed over the insulating film;

a liquid crystal cell electrically connected to the semiconductor device; and

a second plastic substrate,

wherein the semiconductor device and the liquid crystal cell are formed between the first plastic substrate and the second plastic substrate.

3. (Currently Amended) A liquid crystal display apparatus comprising:

a first plastic substrate;

a metal film formed over the first plastic substrate;

a light-emitting device formed over the first plastic substrate;

a resin covering the light-emitting device;

an adhesive over the resin;

an insulating film formed over the [[resin]] adhesive;

a semiconductor device formed over the insulating film;

a liquid crystal cell electrically connected to the semiconductor device; and

a second plastic substrate,

wherein the semiconductor device and the liquid crystal cell are formed between the first plastic substrate and the second plastic substrate.

4. (Currently Amended) A liquid crystal display apparatus comprising:

a first plastic substrate having a concave portion;

a metal film formed over the concave portion;

a light-emitting device formed in the concave portion;

a resin formed in the concave portion to cover the light-emitting device;

an adhesive over the resin;

an insulating film formed over the [[resin]] adhesive;

a semiconductor device formed over the insulating film;

a liquid crystal cell electrically connected to the semiconductor device; and

a second plastic substrate,

wherein the semiconductor device and the liquid crystal cell are formed between the first plastic substrate and the second plastic substrate.

5. (Original) A liquid crystal display apparatus according to any one of claims 3 and 4, wherein the metal film is sand blasted.

6. (Original) A liquid crystal display apparatus according to any one of claims 1 to 4, wherein the liquid crystal cell is transparent to light.

7. (Original) A liquid crystal display apparatus according to claim 1, wherein the light-emitting device is a light-emitting diode.

8. (Original) A liquid crystal display apparatus according to claim 7, wherein the light-emitting diode is connected to an FPC and supplied with current via the FPC.

9. (Original) A liquid crystal display apparatus according to claim 2, wherein the light-emitting device is a light-emitting diode.

10. (Original) A liquid crystal display apparatus according to claim 9, wherein the light-emitting diode is connected to an FPC and supplied with current via the FPC.

11. (Original) A liquid crystal display apparatus according to claim 3, wherein the light-emitting device is a light-emitting diode.

12. (Original) A liquid crystal display apparatus according to claim 11, wherein the light-emitting diode is connected to an FPC and supplied with current via the FPC.

13. (Original) A liquid crystal display apparatus according to claim 4, wherein the light-emitting device is a light-emitting diode.

14. (Original) A liquid crystal display apparatus according to claim 13, wherein the light-emitting diode is connected to an FPC and supplied with current via the FPC.

15. (Previously Presented) A liquid crystal display apparatus according to any one of claims 1 to 4, wherein the liquid crystal display apparatus is incorporated in a cellular phone.

16. (Previously Presented) A liquid crystal display apparatus according to any one of claims 1 to 4, wherein the liquid crystal display apparatus is incorporated in an electronic book.

17. (Previously Presented) A liquid crystal display apparatus according to any one of claims 1 to 4, wherein the liquid crystal display apparatus is incorporated in a wrist watch.

18. (Previously Presented) A liquid crystal display apparatus according to any one of claims 1 to 4, wherein the liquid crystal display apparatus is incorporated in a personal computer.

19. (Previously Presented) A liquid crystal display apparatus according to any one of claims 1 to 4, wherein the liquid crystal display apparatus is incorporated in a front glass.

20. (Previously Presented) A liquid crystal display apparatus according to any one of claims 1 to 4, wherein the liquid crystal display apparatus is incorporated in an electronic card.

21.-45. (Canceled)

46. (Previously Presented) A liquid crystal display apparatus according to claim 2, wherein the resin has a flat surface so as to fill the depression with the resin.

47. (Previously Presented) A liquid crystal display apparatus according to claim 4, wherein the resin has a flat surface so as to fill the depression with the resin.

48. (Previously Presented) A liquid crystal display device according to claim 1, wherein the resin comprises a transparent particle.

49. (Previously Presented) A liquid crystal display device according to claim 2, wherein the resin comprises a transparent particle.

50. (Previously Presented) A liquid crystal display device according to claim 3, wherein the resin comprises a transparent particle.

51. (Previously Presented) A liquid crystal display device according to claim 4, wherein the resin comprises a transparent particle.

52. (Previously Presented) A liquid crystal display device according to claim 1, wherein the light-emitting device includes a pair of electrodes.

53. (Previously Presented) A liquid crystal display device according to claim 2, wherein the light-emitting device includes a pair of electrodes.

54. (Previously Presented) A liquid crystal display device according to claim 3, wherein the light-emitting device includes a pair of electrodes.

55. (Previously Presented) A liquid crystal display device according to claim 4, wherein the light-emitting device includes a pair of electrodes.

56. (New) A liquid crystal display device according to claim 1 further comprising a polarizing plate over the resin.

57. (New) A liquid crystal display device according to claim 2 further comprising a polarizing plate over the resin.

58. (New) A liquid crystal display device according to claim 3 further comprising a polarizing plate over the resin.

59. (New) A liquid crystal display device according to claim 4 further comprising a polarizing plate over the resin.
